CONSUMER PRODUCT PACKAGING

After the products are shipped to their desired destination, the next step is to transport them to markets and retailers. But first, they need to be packed here as well to make them easy to move and provide protection. There are many packaging techniques used to send products to consumers in bulk and individual form.

PRINTED CORRUGATED BOXES

These Recyclable boxes are commonly used to pack and carry heavy items such as electronics, appliances, wine, fruit & vegetables. They are strong and durable because of their layered paper material. Its main strength comes from the wavy ripple in the middle. They are called corrugated because of these ripples – Flutes.

PAPER BOARD CARTONS

Paper or cartons box are usually used to pack single products. its lightweight design makes it an ideal packaging device for on-shelf items. Also, printing and graphic designing are easier and more effective on this box. Thus, it can sport eye-catching and appealing profiles of your products while giving it a productive coverage.

BOPP TAPES

BOPP is Biaxially Oriented Polypropylene (BOPP) Film coated with water based adhesive and Our adhesive tapes are made from superior quality adhesive, which provides high tack and adhesion strength required for sealing of cartons to make them pilfer proof.

RIGID BOXES

Premium rigid boxes are some of the most commonly used and sought after boxes within the luxury packaging industry.

It is made up of two main components, a primary chipboard component, the main structural component of the box, and the wrapping that encases the box, which serves as the place for brand messaging.
